

“ EVERY DAY, PLASMA
DONORS ENABLE ME
TO TAKE ON NEW
ADVENTURES.”

Catherine, 52, living with CVID

A person wearing a purple t-shirt, a dark helmet, and climbing gear is seen from behind, climbing a dark, textured rock face. A vertical rope is visible in the center of the frame. The person is reaching up with their right hand and has their left hand on the rock. The background is a vast, dark rock wall with some lighter patches.

HOW IS YOUR DAY?

Making the difference with plasma proteins.
